Ghost Brackets are really simple to put on your motorcycle. This image demo will give you a great idea of how the brackets work, how easy they are to install and how amazing they really are.

In this case we used a 2003 Harley Davidson Fat Boy with Edge Saddlebag p/n ED-SBR-107-S bag and a set of our GB-HD-ST-105 Ghost Brackets. As you will see, the installation is quite simple and should take you no more than 20 minutes from start to finish for both the left and right sides of the bike.
